

Is this it? - no blue sky for us ...probably not

Integration of disparate systems

Geatekeepers and packages

Generation devide comming

Instinctive undersanding, or los

Wikipedia vs. Brittinica

Teaching learning skills

Critical skills

How do we learn what to do

Getting people to push the boundaries

Sharing and colaboration

Intigration with other people's solution

Doing more with less

Managing Expectations

The future is mobile, low-powerd and insecure and perhaps converged

Merged desktops, merged services

Blue Sky

Throw out the computer suites

Let them plug their laptops in

Do they have a laptop?

Managed connectiviy

Application support

Hardware support

Do we need to provide different things?

Deliver work computer as VM

Needs pervasive NW

Where's the storage?

How much S/W? What?

Become a library, or a cybercaffe?

What hapend to colaboration?

New software and systems

Online meetings

Why are we here? Technology deficient

No such thing as a computer any more

Stop trying to manage academics

Free-range computing with a managed pasture
